

MegaPay Mobile

Employees have instant access to their MegaPay
payslips via their mobile devices.

MegaPay Mobile

With more freedom and flexibility to work remotely, it is important to stay connected with your employees and to ensure people feel that sense of belonging to something bigger – even when out of the office.

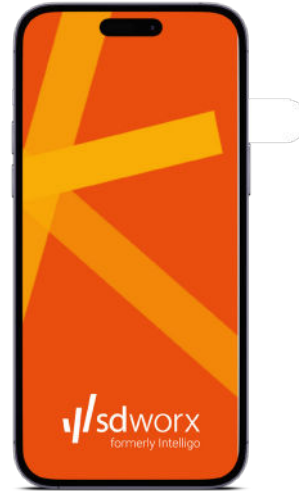

With our mobile app, your employees can easily access their MegaPay payslips and historical P60 information with their own mobile devices – anytime, anywhere.

What does it do?

MegaPay Mobile enables employees to access their payslip details via their smartphone.

They can:

- View Current Payslips
- Access Historical Payslips
- View Historical P60s
- Branded with your Company Logo
- Check their Payments and Deductions

Employee Access

Perfect for remote workers and non office based employees, e.g. construction workers, distribution staff, field sales consultants, or staff that do not have immediate access to PCs. They simply download the App for free, log in and view their Payslip and P60 details.

Enhances Communication

MegaPay Mobile lets you connect directly with ALL your employees, not just those sitting in front of a PC, delivering accessibility, flexibility and control that will enhance your Payroll Department, allowing more time to focus on core Payroll strategies.

Device Independant

Employees do not need a special device or special software to access MegaPay Mobile. It is available free-to-download via iPhone, Android, or any other suitable smartphone or tablet device.

Security

MegaPay Mobile is hosted on Microsoft's cloud service, Azure. This is hosted in the same data centres as other cloud services which comply with industry standards (such as ISO 27001) for physical security and availability.

1

Saves paper. No more need for hardcopy payslips.

2

24/7 access to Payslip data saving time and reducing Payroll costs.

3

Provides staff with rapid and efficient service.

4

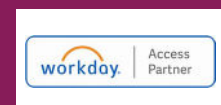

Employees "out of the office" can view Payslips.

5

Minimises admin - freeing up staff and resources.
