

# MegaPay UK

MegaPay is a versatile payroll engine that has been built to be configurable, robust and adaptable – to changing circumstances, environments, and requirements – no matter the complexity.

## Overview

The No. 1 payroll system choice for medium and large enterprises. MegaPay is trusted to pay millions of people every month, in more than 1,000 companies all with their own unique complex payroll needs. There is no need to build bespoke systems, we configure our powerful system to meet your requirements. MegaPay has gained an enviable reputation not only for its flexibility and robustness, but also for the level of product support delivered by our award winning Customer Services team.

A key market differentiator for MegaPay is that it is a single solution that caters for payroll in both the UK and the Republic of Ireland. The normal product update cycle is three times per year. One is for UK legislative changes, a second is for Irish legislative changes and finally the third update is typically a mid-year release containing new added value features and functionality. All system updates are provided free of charge to clients with up to date software licence and maintenance agreements.
